

My name is Andy Smith and I Head the Singapore office of The RSA Group (www.thersagroup.com), which is a major executive search firm that specializes in life sciences and healthcare.

On behalf of a well-established Institute in Singapore whose mission is to conduct translational research in immunology, I am being retained exclusively to manage the recruitment of an Assistant Professor/PI who will build a team and lead an independent research programme in an area of fundamental and translational immunology.

Key Responsibilities

- Drive research of immunology programs that can be translated into potential therapeutics
- Build a lab/team of c.8-10 staff and lead an independent research programme
- Secure local and international grant funding, from Government and/or industry sectors
- Establish international collaborations
- Mentor PhD students, research fellows and budding clinician scientists

Education and Experience Required

- PhD qualified with a strong academic track record and experience in basic science
- An existing PI or, a Post Doc with an outstanding track record and the ability to lead a group
- Research expertise in immunology and/or in vaccine/drug development platforms that can be applied/adapted to immunology
- Evidence of ability to translate findings and/or collaborate with individuals to move projects along the translational pipeline
- A publication record that includes first author papers in major scientific journals (i.e. papers with Impact Factor >15)

To register your interest or, for a confidential discussion, please message me at andy.smith@thersagroup.com

Best regards

Andy
